

# Mn-Cu Plus

foliar nutrient

## CONCENTRATED FLOWABLE MANGANESE (30%) WITH NITROGEN AND COPPER

Historically the correction of Manganese and Copper deficiencies has been a time-consuming, dusty and hazardous operation involving bulky bags of Manganese and Copper powders. Today simple liquid solutions have become available. However, these still require high application rates and give rise to problems with transport and disposal of used packaging. To provide farmers with an effective alternative Ilex have introduced the highly concentrated flowable liquid **Mn-Cu Plus** as part of their new generation of foliar nutrients.

Due to its unique combination of soluble Manganese and Copper nutrients, **Mn-Cu Plus** is able to demonstrate superior performance even at very low rates of application.

### Key Benefits

- Fast-acting foliar
- High concentration of soluble Manganese with Copper
- Effective at low application rates
- Also provides plant available Nitrogen and Sulphur
- Dissolves completely in the tank

### More Nutrition

As well as 300g/l of Manganese and 20g/l of Copper **Mn-Cu Plus** also provides the crop with 100 g/l of Nitrogen and Sulphur.

### More Coverage

1 x 5L can when applied at the maintenance rate is sufficient to treat 10ha.

***“Perfect as an early spring treatment for my cereals when they need some copper along with the manganese”.***

#### ANALYSIS:

Manganese (Mn)	30% w/v	(300 g/l)
Copper (Cu)	2% w/v	(20 g/l)
Nitrogen (N)	10% w/v	(100 g/l)
Sulphur (S)	10% w/v	(100 g/l)

### Application rates for arable crops:

Apply **Mn-Cu Plus** to prevent and correct manganese and copper deficiencies as follows;

Maintenance Rate: Apply @ 0.50 – 0.75 l/ha

Deficiency Rate: Apply @ 0.75 – 1.50 l/ha

In the case of severe Manganese and Copper deficiencies repeat applications are recommended until symptoms are corrected.

Pack Sizes: 2 x 5L boxed and 600L IBC
