MIXING INSTRUCTIONS AND GENERAL GUIDANCE WHEN USING ILEX FOLIAR NUTRIENTS

All nutrient products which are foliar applied are designed to disperse or dissolve in water. There is a recommended sequence for adding products into the spray tank, depending on formulation type (see below). This should be followed as closely as possible.

Mixing Sequence

Order of addition to tank mix	Product Type	Ilex Product
1.	Water Conditioner	ModipHy Xtra
2.	Water-soluble packets.	
3.	Solid formulations including crystalline solids, dry flowables, water dispersible granules and wettable powders.	
4.	Water-based liquid flowables and suspension concentrates.	
5.	Emulsifiable concentrates, emulsifiable crop oils.	Mn Plus, Mn-Cu Plus
6.	Surfactants, wetting agents etc.	
7.	Water-based solutions and water-soluble liquids and liquid fertilisers.	AdvoCate, Beet Raiser, CaPITAL, Crop Rooter®-Plus, Foliar Boost, Mag Plus, Maniphos, OilSeed Raiser, PK Maxx+, PK Veg, Plus Hy-N, Pro-Cal, Root & Shoot Builder, Stimplex, TenSile
8.	Anti-drift agents	

Ensure the spray tank and lines are thoroughly cleaned before and after use.

The spray tank should be at least half full of clean water with the agitator on full. Agitation should be maintained at all times throughout the mixing and spraying operation.

When combining products in a tank mix, allow each product sufficient time to disperse before adding the next product.

Hard water or high pH

If hard or high pH water is to be used for the spray operation, the compatibility and efficacy of foliar nutrient mixes can often be improved by the inclusion of a water conditioner such as **ModipHy Xtra**.

If the use of a water conditioner is recommended by your advisor this should be added to the tank as the first ingredient.

Check compatibility of products prior to adding to the spray tank. Consult your local advisor or Ilex EnviroSciences Ltd for specific recommendations. Do not apply in strong sunlight. Efficacy may be affected by crop health, growth stage and weather conditions. Ilex EnviroSciences Ltd accepts no liability for damage to treated crops.
